

# ESG litigation and regulatory risks: Managing claims and liabilities for Canadian businesses

July 29, 2024

First published March 11, 2022 and updated as of June 21, 2024.

The concept of [environmental, social and governance](#) (ESG) has become almost ubiquitous. ESG generally refers to the environmental, social, and governance factors that can affect company value and investor decisions. In this article, we briefly outline **some key considerations for managing ESG litigation and regulatory risk for Canadian companies making ESG claims**. We also highlight some relevant cases as examples.

## What you need to know

- Strong ESG performance is valued by many shareholders and consumers, and can be a way to differentiate your brand, although implementing ESG measures comes with risk.
- Failure to take sufficient action on ESG matters can risk proxy contests and harm **to a company's business. Businesses should be aware of and understand their** legal obligations with respect to disclosure of ESG information, as failure to comply can result in enforcement and other sanctions. However, adopting ESG measures can also lead to legal challenges, including by disgruntled shareholders or by groups who feel that the company has not lived up to its stated ESG policies.
- Companies should routinely audit, revise and update their ESG frameworks and disclosure to confirm that they reflect their current operations and ever-evolving industry best practices. Companies should choose an appropriate ESG framework for their intended audience.
- To reduce the risk of misstatements or inconsistent statements, boards and management should have a proactive process for reviewing and approving ESG disclosure prior to its public release. A robust legal review is also advisable.
- ESG disclosures should be entity-specific, measurable, and grounded in verifiable data.

## ESG overview

Although akin to the concept of corporate social responsibility, ESG relates to factors **that are financially material to a company's business and includes such wide-ranging considerations as climate change, sustainability, forced labour and child labour (commonly referred to as "modern slavery"), and diversity, equity, and inclusion.** Recent years have seen growing market and shareholder demand for businesses to implement and report on their ESG commitments and performance.

In response to this demand, companies are increasingly identifying, measuring, and disclosing ESG factors that are material to their operations. While in the past this disclosure was largely voluntary, recent years have seen many levels of government adopt ESG factors as part of their mandatory reporting requirements, which has inevitably led to an expanded risk of litigation and other attempts to hold companies accountable for their claims. Companies should proceed with caution: there has been a more recent trend of ESG backlash, and disgruntled stakeholders may challenge the company if they feel that ESG measures have gone too far.

## ESG litigation

ESG litigation and regulatory risks generally fall into two broad categories. The first **category includes allegations of false ESG claims or misrepresentations in a company's ESG disclosure.** Companies risk both regulatory action and consumer- or investor-led class actions related to alleged misrepresentations.<sup>1</sup> The second category of litigation **risk includes claims directly challenging a company's ESG-related conduct or perceived lapses in ESG action.** Trends in Canada, and globally, include attempts to hold companies accountable for conduct by suppliers or subsidiaries in foreign jurisdictions<sup>2</sup> **and to subject companies to litigation for the contribution of their greenhouse gas emissions to climate change.**<sup>3</sup> However, on the flip side, sometimes companies engaging in active ESG measures risk challenges to their ESG policies for allegedly going too far.

Even if a company can successfully defend a claim on the merits, being forced to defend an ESG record or ESG policies can be costly and lead to reputational harm. Historically, many ESG programs and reports have had little legal oversight or input. To manage the risk of litigation and regulatory or administrative sanctions, businesses should proactively seek experienced legal assistance to review how they are addressing ESG issues while guarding against overstating their commitments and actions. Businesses should also consult with management, counsel, and relevant subject matter experts to **help protect against claims that the ESG policies were not adopted in the business's best interests.**

## Key considerations
